Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Embodiment I: Claims 1-31 (Fig. 2a) are drawn to a circuit for quantifying a high voltage signal;

Embodiment II: Claims 32-54, and 59 (Fig. 6) are drawn to a high voltage amplifying circuit utilizing a current differencing circuit;

Embodiment III: Claims 55-58 (Fig. 10) are drawn to a high voltage amplifying circuit utilizing a current steering circuit;

Wherein:

Embodiment I (claims 1-31, Fig. 2a) describes a general circuit for quantifying a high voltage input signal;

Embodiment II (claims 32-54, and 59, Fig. 6) describes a high voltage amplifying circuit utilizing a current differencing circuit for outputting a high voltage output signal;

Embodiment III (claims 55-58, Fig. 10) describes a high voltage amplifying circuit utilizing a current steering circuit for outputting a high voltage output signal;

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the embodiments is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. A telephone call was made to Mr. Larry E. Vierra on 6/4/2002 to request an oral election to the above restriction requirement, but did not result in an election being made. Furthermore, Mr. Larry E. Vierra advises the Examiner to send out the election/restriction requirement so that he can effectively discuss the case with the Applicant.

Inquiry

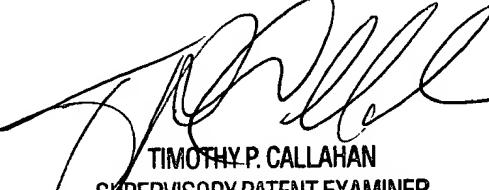

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Linh M. Nguyen whose telephone number is (703) 305-0414. The examiner can normally be reached on Alternate Mon, Tuesday - Friday from 7:30 to 4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy Callahan can be reached on (703) 308-4876. The fax phone numbers for the

organization where this application or proceeding is assigned are (703) 872-9318 for regular communications and (703) 872-9319 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.
